In County and Zone One \$1.50
Zone Two and Beyond \$2.00

EDUCATION PAYS BIG.

An investigation of the income of 864 farmers in one county of Missouri, made by the Missouri college of agriculture, showed that the educated farmer's income was 71.4 per cent larger than that of the untrained farmer. A survey of the incomes of 682 farmers in seven counties of Kansas, made by the Kansas State Agricultural college, showed that the trained farmer has a greater income by nearly \$1,000 a year than those of farmers with a common school education. The United States Department of Agriculture reports a survey of three representative areas in Indiana, Illinois, and Iowa. It is shown that tenant farmers with a college education received an average labor income of \$480 more a year than the man with a high school education and \$970 more a year than the man with only a common school education.

Cornell university reports that men having more than a high school education received \$225 more a year than farmers with a high school education and \$529 a year more than farmers with a common school education. They also report that 5 per cent of the farmers with a district school education received an average labor income of \$1,000, and that 20 per cent of the farmers with a high school education had labor incomes of more than \$1,000. Thirty-per cent of the farmers with more than high school education had labor incomes of more than \$1,000. A high school education is worth as much to the farmer as \$6,000 worth of five per cent bonds. A college education is worth twice as much.

Someone has estimated that if a married woman, during a period of 30 years' married life, has attended to the ordinary duties of the household, she has served nearly 500,000 meals, has put up more than 8,000 jars of preserves, devoted about 35,000 hours to sweeping, washing and scrubbing, and so on at some length. Then this investigator has figured that, at accepted prices for this work, it is worth considerably over \$100,000, and he asks the question, "Why cannot she retire on her savings?" And he answers his own question by asking another one, as follows: "How do you define the ordinary woman's contribution to her family wealth?"

An enterprising Parisienne has opened a millinery establishment with the interior appearance of that celebrated one-story place in Paris, "A la Belle Anglaise." The original little shop stood from 1795 till some few years ago in the Place St. Philippe du Roule, and was famed throughout Europe. Its clients had included Marie Antoinette, Princess de Lamballe, Madame Recamier, Pauline Bonaparte and Elizabeth Foster, duchess of Devonshire. To these was added one distinguished male customer, M. de Chateaubriand, who preferred over all others obtainable elsewhere, the cravats sold at the little milliner's.

If its schools are not among the most vital concerns of a nation, they had better be, because its schools are among its chiefest safeguards for future welfare and happiness, says the Detroit Journal. If we do not progress through the schools, our progress will be one-sided at best; and it is only when the responsibility of developing and directing the schools is shared by actively participating parents within the community, that the best educational results may be obtained.

A doctor says it was eight times as dangerous during the war to be a baby in a cradle than to be a soldier in the trenches. Wasn't it Mark Twain who said the bed was the most dangerous place, because almost everybody died there?

Less sugar per inhabitant than salt was used in the United States last year. Others who are good at statistics declare that if sugar were credited with the salt that got into sugar bowls it would be about a stand-off.

College coaches are to have the rank of members of the faculty in some institutions of higher learning, thus validating the title of "professor" that so many athletic instructors already wear.

Said a soviet official: "There is not a Russian who has lived in America, now back in his native land, who would be willing to return to America." All small favors thankfully resolved.

COMMISSIONER'S SALE

Crittenden Circuit Court, Kentucky
Wm. Redd, Plaintiff,
Against Equity
M. V. Arnold, Etc., Defendants

Wallace, survey of land, running thence with said line S. 12 E. 32 poles and 9 links to a sassafras, with black oak pointers, corner to A. R. Dixon, thence with line S. 46 E. 89 poles and 18 links to a stone near a small post oak marked as corner to said Dixon, thence with an other line of same N. 14 1/2 E. 21 poles and 11 links to a white oak now dead with pointers marked, original corner, thence with original line N. 30 W. 68 poles to two hickories on jude hill original corner thence S. 78 W. 61 poles to the beginning, containing 27 acres more or less.

2nd tract, adjoining the above tract and bounded as follows: beginning of a black oak and sassafras in Wallace line, thence S. 67 E. 90 poles to a small dog wood and post oak, thence N. 13 E. 23 1/2 poles to a white oak, thence N. 58 E. 58 poles to a white oak on a hill side in the original line, thence with the same S. 50 E. 58 poles to a sweet gum, near a branch, the original corner, thence with same N. 65 W. 58 poles to a post oak corner to same, thence due south 49 poles to a small sweet gum and hickory on hill side, thence N. 70 W. 59 poles to a dogwood and black oak in T. H. Wallace line and with same N. 12 W. 56 1/2 poles to the be-

ginning containing 61 acres more or less.

Or sufficient thereof to produce the sum of money so ordered to be made. For the purchase price the purchaser, with approved security or securities, must execute bond, bearing legal interest from the day of sale until paid, and having the force and effect of a Judgment. Bidders will be prepared to comply with these terms.

T. F. HARRIS,
Commissioner.

Clown.
Chew Chew, a health clown, makes the rounds of New York city schools, spreading the gospel of fresh air, proper food and cleanliness.

With him is his little dog, Creemo, whose stunts include pawing his face as if washing when asked what he does in the morning.

The school children are going wild about Chew Chew and Creemo. They are absorbing health facts, because the presentation is made in an interesting way. And they will remember the health clown and what he taught in their old age.

Making school interesting is the greatest problem of education. People in this foreseen civilization remember interesting things, forget the uninteresting.

Fish Eradicates Scarlet Fever.
The Mexican version of "have you a little fairy in your home?" is "have you a little fish in your home?" This arises from the use of a peculiar fish, of the mammalian species, that eats the mosquitoes and "wrigglers" in water, thus preventing the spread of yellow fever. All bodies of water in the city are stocked with the fish, which are provided by health authorities. In this way the mosquitoes are kept down and yellow fever almost eradicated.

World's Largest Boiler.
A boiler capable of heating 1,000 eight-room houses has just been placed in operation in Detroit. It measures 19 by 26 feet inside, and the height from the grate bars to the top of the pipe coils is 35 feet. It can turn 190,000 pounds of water into steam in a single hour, requiring 12 tons of coal to accomplish this feat.

Water Lilies as Food.
From the Iowa conservation board comes the suggestion that we grow water lilies as a staple article of food. It is claimed that the lily, when peeled and boiled, is as nutritious and tasty as the potato.

FLIES DECREASE MILK YIELD

Spraying Furnishes Means of Relieving Cow For the Time and Saves Temper of Milker.

The irritation of cows caused by flies not only lessens the milk produced, but, due to the restlessness of the cows, is a frequent cause of inefficient milking.

The fly spray furnishes a means of relieving the cow for a time at least and of saving the temper of the milker. The following fly repellent mixture is recommended:

Four and one-half-quarts of coal tar dip, 4½ quarts of fish oil, 3 quarts of whale oil, 1½ quarts of oil of tar and ½ ounce of oil of pennyroyal. Dissolve 3 pounds of laundry soap in water, add the ingredients of the spray and bring the whole up to 30 gallons with lukewarm water.

This quantity will spray 40 cows twice a day for 10 days. The spray should be applied in the morning after milking and in the afternoon when the cows are in the barn for silage or green feed.

RELIABLE SOURCE OF PROFIT

Dairy Cow Is More Dependable Than Beef Steer Because Her Products Are Steady.

The dairy cow is a more dependable source of profit than the beef steer, because her products are but slightly affected by market fluctuations and because she is a continuous source of revenue. For the cream or milk checks come in at frequent intervals. Then, too, there is an increasing demand for dairy products to grade and purchased dairy cattle.

Most Profitable Cow.
One good cow is more profitable than several poor ones.

Sterilize Milk Utensils.
For the proper sterilization of dairy utensils an abundance of steam or hot water is needed. Immerse them in boiling water for ten minutes, or put them in a tight closed and thoroughly sterilized with steam for thirty minutes.

Way to Improve Dairy.
Reproduce the late-pregnancy cows with better cows and after birth give enough to eat one of the ways in which a dairy improvement association works successfully.

Her Plans

We like Marjorie Tambour's philosophy. "My plan for the future," she told a reporter, "is to do what I must do, and dream about the things I should like to do." Boston Transcript.

Concave Roads.
Certain English engineers are advocating installation of roads which are concave and drain to the center instead of toward the sides, as is usually found under ordinary conditions.

It Does Make a Difference Where You Buy Your Christmas Goods!
